# Instructions for Form 3581, Michigan Historic Preservation Tax Credit

## What Is the Historic Preservation Tax Credit?

The Michigan Historic Preservation Tax Credit provides tax incentives for homeowners, commercial property owners and businesses to rehabilitate historic commercial and residential resources located in the State of Michigan.

The Michigan Historic Preservation Tax Credit is a nonrefundable credit. However, if the credit exceeds the taxpayer's tax liability, the balance of the credit may be carried forward up to ten years.

This credit is available to qualified taxpayers with a rehabilitation plan certified after December 31, 1998. The credit must be claimed in the year that the certification of completed rehabilitation of the historic resource was issued, and within five years of the year the rehabilitation plan was certified.

Taxpayers may receive a Michigan credit equal to 25 percent of their qualified expenditures. For taxpayers eligible for the federal credit under Section 47(a)(2) of the Internal Revenue Code (IRC), the Michigan credit is 25 percent of the qualified expenditures less the amount of the federal credit claimed.

**NOTE:** If the resource is sold or the certification of completed rehabilitation is revoked less than five years after the credit is claimed, a percentage of the credit will be subject to recapture.

## Eligibility

The Michigan Historic Preservation Tax Credit is available to eligible assignees, owners or long-term lessees of qualified historic resources who undertake rehabilitation projects that are certified by the State Historic Preservation Office (SHPO), Michigan Historical Center.

Property owners undertaking rehabilitation projects on depreciable properties that qualify for the federal historic preservation tax credit must first apply for the federal credit.

## Qualified Expenditures

Qualified expenditures are capital expenditures that would qualify under Section 47(a)(2) of the IRC except that

the expenditures were made for a non-qualifying historic resource under IRC. A taxpayer with qualified expenditures eligible for the federal credit must claim and receive the federal credit to qualify for the Michigan credit. The expenditures must be paid after December 31, 1998 for the rehabilitation of a historic resource but not more than five years after the certification of the rehabilitation plan.

The amount of the qualified expenditures must be equal to or greater than 10 percent of the State Equalized Value (SEV) of the rehabilitated property. If the historic resource to be rehabilitated is part of a historic or non-historic resource, only the SEV for that portion can be used. If the SEV has not been determined for the historic portion, or the historic resource to be rehabilitated does not have an SEV, the total qualified expenditures must be equal to or greater than 5 percent of the resource's appraised value.
